

NJ Do Not Call List should NOT be altered in anyway! I used to receive unsolicited calls morning, noon and night, which interfered with my family life (especially my infant baby - who was awakened many times by solicitors)! It's not as easy as turning off your telephone as my husband is a firefighter is depends on the phone to be on at all times. The solicitors do not care who you are or what you are doing at the time of their call (eating dinner, playing with the children, etc.) - they are just aggravating you to try and make money off of you. solicitors are truly out of control and should have controls placed upon them. It's bad enough that we receive junk mail, junk e-mail!!! When is enough enough?
